VMware Statement Regarding Ukraine

March 2, 2022

Updated April 12, 2022

On March 5, VMware announced its suspension of all business operations in Russia and Belarus, and the Donetsk and Luhansk regions of Ukraine. We stand with Ukraine, and we commend the bravery of the Ukrainian people.

The human toll is devastating and like other global businesses, we are committed to supporting our Ukrainian team members, customers and partners. We are also seeking to support non-Ukraine-based employees with family members located in Ukraine with information to access available resources. We continue to support our employees in Russia, as they are adversely impacted by the consequences of their government's actions.

The suspension of operations includes suspension of all sales, support, and professional services in both countries in line with VMware's commitment to comply with sanctions and restrictions. We are committed to preparedness and vigilance in this fluid situation and will

comply with all applicable restrictions on the export and re-export of our products and services.

We're working to help protect customers in Ukraine from cyberattacks and loss of continuity. For example, we are working with customers and partners in Ukraine – including large financial entities – to help migrate data center applications and workloads out of the country to other European data centers. We're providing 90 days of free services to support that effort.

We are also working with governments and customers across the globe to provide digital infrastructure and cybersecurity assistance. As a founding member of the Joint Cyber Defense Collaborative (JCDC) convened by the U.S. Cyber and Infrastructure Security Agency (CISA), VMware is actively aligned with a global network of industry and public sector organizations focused on early warning and rapid response efforts to protect critical infrastructure.

Our hope is for peace to be restored.

*Здесь и ниже, частичный перевод с английского языка абзацев 1 и 3 заявления.

5 марта VMware объявила о приостановке всех бизнес-операций в России и Беларуси, а также в Донецкой и Луганской областях Украины.

Приостановка операций включает приостановку всех продаж, поддержки и профессиональных услуг в странах, в соответствии с обязательством VMware соблюдать санкции и ограничения. Мы стремимся к готовности и бдительности в этой нестабильной ситуации и будем соблюдать все применимые ограничения на экспорт и реэкспорт наших продуктов и услуг.
